PARADOLIA

### WINNER CONTRACT PARTITIONS + WALL SYSTEMS

Paradolia screens and wall panels create privacy and reduce acoustical distractions. Artfully and thoughtfully created by a variety of featured designers, the Paradolia portfolio showcases solutions from Tim Alpen, Brad Ascalon, Kauppi & Kauppi, and Stone Designs. Options with magnetic markerboards, tackable surfaces, mobility, and shelves create a collaborative atmosphere that provides sound absorption.

Softened floor screens, with and without a markerboard accent, are a mobile option that effortlessly move from space to space. A-frame screens divide space while serving as a collaboration tool and are easily nested for storage. The dual-sided floor screen, featuring a pass-through shelf and storage system, is a mobile unit that has tackable felt and magnetic markerboard surfaces. Angled leg floor screens are available in two sizes and provide a large tackable space with solid hardwood legs. The wall panels attach to a suspension rod with leather straps, providing functional sound absorption for walled environments.
